DETAILED ACTION

1. Receipt is acknowledged of the Supplemental Amendment filed October 30, 2006.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Chan on March 1, 2007.

The application has been amended as follows:

IN THE CLAIMS:

Claims 1, 3-10, 21 and 22 have been cancelled.

In claim 24, line 6: Inserted the term -- depressable -- before the terms "push buttons".

In claim 33, line 3: Inserted the term -- depressable -- before the terms "push buttons".

In claim 33, line 5: Inserted the terms -- depressable push -- before the term "button".

In claim 33, line 7: Inserted the terms -- depressable push -- before the term "buttons".

Art Unit: 2876

In claim 40, line 2: Inserted the term -- depressable -- before the terms "push buttons".

In claim 41, line 2: Inserted the terms -- depressable push -- before the term "button".

Allowable Subject Matter

3. Claims 24-41 are allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art to Cragun shows an ATM machine having a user interface in the form of a touch sensitive screen on which regions 31-34 form a group of indicators which provide tactile information, such as Braille markings, corresponding to textual data, wherein the indicators (Braille markings) 31-34 have different shapes. Furthermore, the newly cited prior art to Sakurai teaches an electronic device having depressable operating buttons having various surface shapes and/or texture so that each of the operating buttons can be identified by touching on it. However the prior art of record, taken alone or in combination, fail to teach or fairly suggest, in conjunction with other limitations in the claims, an ATM machine having a plurality of depressable push buttons protruding through a surface of the ATM, wherein each depressable push buttons have different shapes compare with the other buttons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sakurai (US 2003/0058139 A1) discloses an electronic device having operating buttons all of different shape and/or texture.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to April A. Taylor whose telephone number is (571) 272-2403. The examiner can normally be reached on Monday - Friday from 9:00AM - 5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on (571) 272-2398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Communications via Internet e-mail regarding this application, other than those under 35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to [april.taylor@uspto.gov].

All Internet e-mail communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the official Gazette of the Patent and Trademark on February 25, 1997 at 1195 OG 89.
